

REMARKS

New claims ⁱⁿ11 and ^{to}12 are added in order to highlight additional patentable features of this invention.

These claims are directed, e.g., to the third embodiment discussed at specification page 19, line 22 - page 20, line 11 and page 27, line 21 - page 28, line 14.

The specification has been amended to correct an inadvertent error in drafting the original application, in which a description of the third embodiment was inserted by mistake into the background section of the application at page 12, last paragraph, even though the subject matter discussed was described as the third embodiment of the invention in the detailed description of the invention section of the application at page 19, line 22 - page 20, line 11 and page 27, line 21 - page 28, line 14.

Early and favorable consideration of this application is respectfully requested.

Respectfully submitted,

 Reg # 31,689

Date: November 27, 2002
